Summary

I was born in the Philippines and grew up in Imus Cavite. I am studying at Cavite State University, located in Indang Cavite. I am productive and flexible in websites, designs, algorithms, and others related to computer programming and development. I volunteer regularly and am passionate about technology and programming.

I am an undergraduate student with a course of Bachelor of Science in Computer Science. I do freelance as a frontend developer who creates websites, designs, projects, and other programming related.

Strength: I can code and work within a short period, I give my best for each project I'll make, and my goal is to provide quality outputs for my clients.

Weakness: I am not good at communicating the use of other languages like English, and I don't have a deep vocabulary.

I can develop a website using the design provided, and I followed the instructions carefully. I developed websites like a personal website, blog, and online ordering system.

I want a friendly environment and a healthy community that are willing to collaborate and help me to improve my skills. I love my job as a developer, and one of my priorities is to help people solve their problems and grow.

Experience

Web Developer

CREOTEC

Jan 2021 - Feb 2021 (2 months)

I have working experience at Creotec company during work immersion.

- I'm head programmer of our IT Department.
- I built payroll applications for accounting department, attendance application, and weight converter.
- I used MIT App Inventor for creating those applications. However, I can build those application using Javascript.
